B. PRODUCTIVE UNITS

In the framework of your participation in AgriStability, you must provide your operation's number of productive units, for each of the fiscal periods ending from 2008 to 2013. The number of productive units provided enables us to adjust your operation's reference year production margins in relation to its production capacity during the participation year.

You will find in the table, where appropriate, the productive units listed in your crop insurance and stabilization insurance file for the participation years involved. They could be different from those appearing on your crop insurance certificates or your stabilization insurance payment sheets. They were established on the basis of your fiscal period ending in 2013 and any twelve-month periods prior to the start of that fiscal period back to 2008, and not of the period covered by the insurance year.

For the productions already entered, please complete any spaces that were left blank. Also report any other of your operation's productions. You must report this information based on the period covered by the fiscal period ending in 2013. If you do not have enough space in the table, please add another sheet containing the same type of information.

To report all your operation's productive units based on your fiscal period, see the *Guide for reporting productive units* on our website at www.fadq.qc.ca or contact your service centre.
