B. PRODUCTIVE UNITS

In the framework of your participation in AgriStability and Agri-Québec Plus, you must provide your operation's number of productive units, for each of the fiscal periods ending in 2016. The number of productive units provided enables us to adjust your operation's reference year production margins in relation to its production capacity during the participation year.

For reference purposes, you will find in the table, the productive units of the last participation year for which you transmitted your financial information. They may be helpful to you in completing the table of productive units for the 2016 participation year.

In addition, we have shown the productive units listed in your crop insurance and stabilization insurance file for the 2016 participation year. They could be different from those appearing on your crop insurance certificates or your stabilization insurance payment sheets. They were established on the basis of the twelve-month period following the end of the fiscal period ending in 2015 and not for the period covered by the insurance year. Your productive units could be subject to an adjustment based on the period covered by your fiscal period, according to your 2016 declaration.

For the productions already entered, please complete any spaces that were left blank. Also report any other of your operation's productions. You must report this information based on the period covered by the fiscal period ending in 2016. If you do not have enough space in the table, please add another sheet containing the same type of information.

To report all your operation's productive units based on your fiscal period, see the *Guide for Reporting Productive Units* on [our website](#) or contact your service centre.
